MCS

100% key copying protection

MCS. 100% key copying protection

With MCS's world-wide unique magnetic technology, each user can rely on a locking systems with unparalleled security. This is firstly down to keys' 100% copying protection and secondly, comes as a result of the system's extensive calculation capabilities. Future planned extensions can already be integrated when planning the locking system. Consequently, your facility can continue to grow and MCS grows with it.

MCS benefits at a glance

- › Protected against 3D printing
 - › For complex master key system structures
 - › Very high protection levels against burglary
 - › Patent protection until 2035
-

MCS. One system, many details

The MCS cylinder contains eight freely rotating magnet rotors to the left and right of the key channel and each one is assigned to one of the four magnet pills on the MCS key. The magnet rotors are brought into a locking position using keys with access authorisations. The mechanic bars above these assign the locking authorisation. The MCS key combines no less than two technologies for triple security: one magnetic and two mechanical codings.

All-round protection

Copy keys, additional cylinder and lock charts are available from authorised EVVA Partners but only with corresponding proof of legitimacy, the EVVA security card.

Benefit from the security features

The reliable FPS cylinder technology offers lasting protection against illegal opening methods:

Drilling protection

Plug pulling protection

Practical, handy and appealing

Optionally, MCS keys are available in a range of colours. The colour coding helps to easily distinguish between keys.

Unique EVVA service

Since 1919, EVVA services have been focused on customer benefits. This has resulted in market-based products, the best product and consulting service as well as an outstanding locking system expertise.

Locking systems by professionals

Master key systems define who has access to which facilities. EVVA provides comprehensive master key system and access control system expertise as well as high-performance locking systems.

Mechanical and electronic locking systems

EVVA is one of the few manufacturers that develops and produces electronic and mechanical locking systems in Vienna. EVVA's electronic and mechanical products can be combined in locking systems around the world depending on customer demands.

Excellent advice

EVVA is your reliable partner. Be it for technical queries concerning EVVA products or planning issues regarding a project, you can always count on EVVA.

Innovation made in Austria

Trust a family-owned business that has been researching, developing and producing for 100 years and operates in a respectful and cooperative way. EVVA – Leading European manufacturer in mechanical and electronic locking systems!
